DETAILED ACTION

Request for Continued Examination (RCE)

The RCE filed on January 2, 2008 has been processed. A non-final follows.

Allowable Subject Matter

The indicated allowability of claims 1-2 and 5-15 is withdrawn in view of the newly discovered reference(s) to Nieboer (7,024,387) filed in the IDS submitted on January 2, 2008. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-2 and 5, and 7-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindberg (2003/0097328) in view of Nieboer (7,024,387).

Lindberg discloses the invention substantially as claimed, as set forth in the Office Action mailed on May 8, 2006. Lindberg does not disclose a derivative product

that comprises an option contract the potential hedge transaction product comprises a futures contract or wherein the variable defined order price of the derivative product is a function of an original order price, an updated price of an underlying product and at least one price determination variable value based on a predetermined formula received at the match system. Nieboer teaches a method for conditional order transactions in securities comprising an option contract the potential hedge transaction product comprises a futures contract (col.2, lines 54-60) and wherein the variable defined order price of the derivative product is a function of an original order price, an updated price of an underlying product and at least one price determination variable value based on a predetermined formula received at the match system (col.24, lines 25-33). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Nieboer within Lindberg for the motivation of showing that a variable defined order price may be executed in a matching system.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lindberg in view of Nieboer, as set forth in the Office Action mailed on May 8, 2006.

Response to Arguments

Applicant's arguments with respect to claims 1-2 and 5-15 have been considered but are moot in view of the new ground(s) of rejection.
